# WORK EXPERIENCE

University of Massachusetts, Amherst, MA, USA

Research Assistant, September 2022 – Present

- Using ML and computer vision to develop multispectral satellite data representations for modeling water quality and sediment movements in Earth's rivers
- **Dolby Laboratories**, San Francisco, CA, USA

Ph.D. Research Intern, May 2024 – August 2024

- Collaborated with Dr. Gang Hua, Dr. Andrea Fanelli, and Deepak Chandran on exploring task representations to improve performance and efficiency of machine learning models
- Thinking Machines Data Science, Taguig, Philippines [https://thinkingmachin.es/]

Team Lead & Machine Learning Researcher, February 2020 – January 2022

- Created and delivered a model for predicting facility utilization of a telecommunications company with >80% accuracy. This resulted in a signed project worth \$1-2 million.
- Developed cloud-based web/data analytics applications by performing backend (primary) and DevOps roles for an investment firm with >\$300 billion in assets under management. Developed primarily using Python, FastAPI, Red Hat OpenShift, Amazon Elastic Kubernetes Service, Elasticsearch, Kibana, Grafana, RedisGraph, PostgreSQL, Dagster, and CloudBees Jenkins.

University of the Philippines, Quezon City, Philippines

University Researcher III, May 2018 – January 2020

- Conducted research for a Philippine California Advanced Research Institutes (PCARI) project entitled "AIRSCAN: Collaborative Aerial Robotics in Large-Scale Urban Infrastructure Management" in collaboration with University of California Berkeley
- Proposed and implemented algorithms for 3D reconstruction, resulting in greater than 80% improvement to the surface reconstruction approach compared to baseline classical algorithms. This also resulted in the publication of a research paper.
- Designed and executed a customized algorithm for 3D semantic building map augmentation and image object detection for industry partners. This work resulted in a patent submission.
